Introduction

Driven and detail-oriented full-stack developer looking for my next job opportunity. I have worked on both solo and team projects. I am a problem solver and am willing to take on multiple hats for a role. If there is a new technology that I need for a role, I am eager to learn said technology to better myself and my work speed.

Technologies

HTML, CSS, SCSS, JavaScript, ReactJS, Preact, AngularJS, Bootstrap, Node, Express, Pug, Python, Ruby, Java, MongoDB, PostgreSQL, SQL Server, MySQL

Tools

Visual Studio Code, Visual Studio, Adobe Photoshop, Adobe Illustrator, Adobe XD, Figma, Git, NPM, Jira, Oracle Content Management, Amazon AWS, Azure DevOps, Webflow

Experience

Associate Cloud Native Developer - Redstone Content Solutions   *April 2022 - May 2023*

- Contributed to Redstone's clients' projects throughout five various projects and two to three project phases per project, such as two projects with Oracle's departments as well as Redstone's company site
- Constructed around twenty components and content layouts, such as customizable banners, two and three column layouts, and cards that flip on being hovered, to be placed within Oracle Site Builder
- Engaged in and drove various pre-sales meetings with prospective clients, such as explaining the terminal commands of the Oracle Content Toolkit application

Web Developer Intern - Health Catalyst   *June 2021 - September 2021*

- Contributed to major improvements to Health Catalyst's healthcare summit portal to add several key features and numerous UI/UX improvements for guests and users, such as searching for speakers and other participants as well as the summit schedule
- Researched Health Catalyst's Cashmere library within one week, allowing me to integrate about 40% more of my implementations to the Azure repository compared to before, thereby streamlining the development process
- Corresponded with my two coworkers to implement our changes on a consistent basis

Web Developer Intern - Zapmoto   *January 2021 - June 2021*

- Architected around fifteen widgets allowing users to be redirected to the Zapmoto site while scraping a car's VIN number to streamline the car ordering experience
- Developed and maintained five pages for the site, such as the site's Home and About pages and an updated list of partnered dealerships, via Webflow and Adobe Creative Suite
- Established two APIs into the site, with one such example being the U.S. National Highway Traffic Safety Administration (NHTSA) Vehicle API to validate cars passed from the widget

Education

B.S. in Web Design and Development - Neumont College of Computer Science   *October 2018 - September 2021*

3.89 GPA, Magna Cum Laude

- Employed part time as a Resident Advisor from June 2020 to September 2021, remaining available to the residents of my apartment complex and assisting with responsibilities at the three other complexes, such as setting up student apartments and hosting quarterly events
